

PATIENT PRE-TREATMENT FORM

With over three million treatments performed worldwide by **Authorised Treatment Providers**, DermapenWorld is the innovator of automated microneedling — **original, trusted, Australian**.

Dp4™ has won multiple awards and has become one of the most trusted names in the medical aesthetics industry. Thousands of practitioners endorse Dp4's world-leading technology, which helps 'rewrite skin history' without side effects or downtime.

Dp4's oscillating action effortlessly glides over the skin to stimulate the body's natural healing and regenerative response. When combined with Dp Dermaceuticals and Meso-Glides, the treatment becomes even more versatile and can target the appearance of:

- Ageing
- Wrinkles
- Uneven skin tone
- Uneven skin texture
- Stretch marks
- Scarring
- Alopecia

Dp4™ may be safely used for face, body, scalp and intimate rejuvenation.

Dp4™ treatments are fast, effective, comfortable and offer visual results after just one session. Based on your areas of concern, your DermapenWorld **Authorised Treatment Provider** will recommend a series of treatment in conjunction with Dp Dermaceuticals home care products for optimal results and maintenance.

If you are experiencing any of the following conditions or concerns, on or around the treatment area, you will need to let your practitioner know prior to treatment:

- Active Psoriasis
- Active Herpes simplex (cold sores)
- Scleroderma
- Open lesions
- Skin cancer
- Undiagnosed/unusual moles
- Active lupus erythematosus
- Active collagen vascular disease
- Acne vulgaris stage IV
- Warts
- Bacterial/fungal infections
- Undiagnosed solar keratosis
- Haemophilia (or other blood clotting disorders)
- Active vitiligo
- History of keloid scars

Also, inform your practitioner if you are (or planning to get) pregnant, have any cosmetic tattooing, have recently experienced any chronic illness or are undergoing major medical care.

If you are doubt regarding any health condition or medications that you may take, always seek medical advice from your physician.

Certain health conditions, medications, supplements and lifestyle factors may affect a Dp4™ procedure. All patients are required to complete a DermapenWorld Consultation Form prior to treatment for assessment by an **Authorised Treatment Provider**.

All patients should prepare and prime their skin for at least 2 weeks prior to treatment with Dp Dermaceuticals. Your practitioner will prescribe a customised skin solution for pre-op, post-op and ongoing maintenance.

COMFORT

Your Dp4™ **Authorised Treatment Provider** will take all steps to ensure total comfort during for your Dp4™ procedure. If at any point you feel discomfort, please inform your practitioner immediately.

PROTECTION & SAFETY

Your Dp4™ treatment only uses sterile, single-use consumables throughout the procedure, ensuring complete health and safety.

TREATMENT DURATION

Please allow a minimum of 20-30 minutes for your Dp4™ clinical treatment including preparation, combination therapies and post-care.
